Wireless broadband is not your ordinary wireless. Most "Wireless Internet" that you hear about is "within-building" technology that allows users to connect to an existing internet connection.

Wireless broadband is something bigger. It is a new way of bringing the internet straight from us to your home or business. Instead of traveling over phone or cable lines, wireless broadband travels directly over the air waves from our broadcasting station to you. No dealing with utility companies, no hidden fees.

Wireless broadband is fast. Very fast. You can expect speeds of up to 3Mb download and 1.5 Mb upload with up to 10 Mb burst capabilities. That's 12 times faster downloading than standard DSL, and one of the fastest uploads available on the consumer market.

Wireless broadband is inexpensive. Since we don't need to rent space on phone or cable lines, we can offer wireless broadband to you at a fraction of the cost of any comparable-speed internet connection. Also, due to recent federal legislation, wireless broadband is tax free.

Wireless broadband is secure. Using industry-standard DES or AES encryption, you can send data over the CNSP wireless network with as much confidence as a landline.

Wireless broadband is here. It is available Santa Fe, Albuquerque, Espanola and some surrounding areas, including many that cannot get DSL or Cable.

Call us today at 896-4900 or 986-1669 to find out more about wireless broadband. We'll be happy to answer all of your questions.

Regarding Equipment

Instead of renting the equipment, any customer may buy it at any time for \$450. In addition, customer may lease equipment for \$20 indefinitely from CNSP if within 7-30 Miles. If within 1-7 miles, equipment rental is \$10. If within 0-1 miles, equipment rental is \$5.
